System Integration Services Catalog #32

Design, Integration & Installation Services

Custom Solutions For Your Specific Needs

CONNECTING YOUR INFRASTRUCTURE TO THE TECHNOLOGY RESOURCES YOU NEED

Affordable Video System Design & Integration

AC Video Solutions can design and integrate your entire video system from production to archiving. We offer full system design services as well as studio construction, lighting grid and cyclorama installation, including wiring, testing and training of all systems.

A/V System Installation

AC Video Solutions installs all types of projectors, screens, smartboards, whiteboards and monitors for any type of environment, including schools, corporations, and hospitals.

Studio Design and Construction

We will design your video studio with your architect and general contractor to make sure it meets your specifications and requirements. We can also design and install lighting grids and cyclorama walls.

Video Production & Streaming

Our video production services includes multi-camera production for live events on location and in the studio, as well as web streaming. We provide the equipment, crew, and management for your project. Trust us to handle everything from start to finish, for any type of production including live concerts, plays, dance and corporate events.

Digital Signage

Consolidate real-time data and other content from a variety of sources and customize the output on a video display screen to provide users one place to find the important information they need. Our services include installation of a preconfigured media server, monthly management, maintenance, design, content licensing and technical consulting.

PROFESSIONAL VIDEO SOLUTIONS

- EXPERT CONSULTATION & INITIAL DESIGN
- A/V SYSTEM DESIGN & INTEGRATION
- VIDEO PRODUCTION & STREAMING EXPERTISE
- TRAINING & SYSTEM MAINTENANCE
- SERVICE CONTRACTS & ONGOING SUPPORT

flexible solutions to suit your workflow

ENGINEERING PROFESSIONALS WITH CUSTOMER-CENTRIC VALUES

Decades of experience in developing solutions for the professional video industry has resulted in competencies beyond technology and expand into understanding the business and budget needs of clients. We have learned how to seamlessly integrate existing technology with new systems in order to meet budgets and deadlines and we do so in a way that allows for future system updates and expansion. We integrate the realities of budget and time limitations with your need for better systems and modernization and understand the pain associated with changing operations. Even positive change can be painful and costly beyond budgetary concerns and we have learned to navigate the technology, financial and human resistance to change in order to bring you the results you need and foster a positive environment for your operation to change, improve and thrive.

MANAGING SYSTEMS TECHNOLOGY UPDATES WITH THE HUMAN FACTOR IN MIND.

System Maintenance and Service Contracts

Our engineering staff can help maintain your video system. We offer service contracts and on-call services.

3 or 5 Year Extended Warranty Contracts

Overall Benefits include 100% parts and labor, no deductibles, contract is transferable in the event of a sale, includes power surge protection.

Effective Technology Consulting

Make the most of your existing technology and add the right new equipment with effective technology consulting services from AC Video Solutions. We provide contract and technology reviews to discover your technology assets and contract needs. Once we've catalogued your equipment, we help you to decide what stays, what needs to be replaced, and what you need to add. Our technology consulting service helps build reliable, state of the art video production systems, television studios, and post-production systems, at an affordable price.

CUSTOM SOLUTIONS

We offer full design and integration services including studio construction, lighting grids, cyclorama installation, wiring, testing and training on all systems.

A/V SYSTEM INSTALLATION

We install all brands of projectors, screens, smartboards, whiteboards and monitors for schools, corporations, restaurants, hospitals and other business locations.

VIDEO PRODUCTION & STREAMING

We provide multi-camera live and recorded event production services both on location and in the studio. We can supply all equipment, crew, and technical management for your project.

Entire Project Development Or Specific Assistance With Any Portion Of Your Project

- Consultation
- Site Surveys
- System Design
- Integration
- Construction & Wiring
- Test & System Commissioning
- Documentation & Training
- Service & Support
- Extended Warranty

Whether your system is a simple projector installation or a sophisticated, state-of-of-the-art broadcast system, we are here to help. We can handle your entire project development or any portion of your project as your needs dictate. From consultation to site surveys and system design, construction and installation, system commissioning and service, we have the workforce and talent to address any application. If you can dream it, we can build it - on budget, in time and with your satisfaction in mind.

Accident & Breakdown Extended Warranty

Developed specifically for the professional video and broadcast market, our new Extended Warranty program goes beyond traditional warranty offerings and encompasses benefits specific to the needs of our industry. The program includes:

EXTENDED WARRANTY: Create warranty protection of up to 5 years for your equipment and avoid service budget overruns.

MANUFACTURER REPAIRS COVERED: Repairs can be performed by our partner's own manufacturer certified technicians OR directly by the manufacturer; either way the charges are covered.

REPLACEMENT IF UNREPAIRABLE: Sometimes equipment is simply not repairable; in such eventuality, we will replace your equipment with the same model (if available) or equivalent.

POWER SURGE PROTECTION: The program includes, for no additional charge, power surge protection to ensure your investment in equipment is secured.

ACCIDENTAL DAMAGE FROM HANDLING: Inexpensive option available that protects you, your people and your budget from unfortunate accidents.
